## DETAILED ACTION

### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lindsay G. McGuinness on 2/2/2007.

The application has been amended as follows:

24. (Amended) A central network device according to claim ~~43~~ 23, further comprising an AC to DC converter.

32. (Amended) A method for powering a local area network using power from a central network device, the method comprising:

discovering at least one member network device capable of accepting power over the local area network on a combined power/data link in the local area network, the combined power/data link including at least one wire for simultaneously providing both power and data to the at least one member network device; and

determining a threshold power level for powering a plurality of discovered member devices capable of receiving power on combined power/data links; and

providing assist power, from energy stored by an electrochemical power source in the central network device, to the at least one selected member network device via the combined power/data link in the event that a primary power supply is able to provide only a portion of power required by the at least one member network device.
